

New nautical theme fixtures

I bought some nautical theme good outdoor weather-proof light fixtures from Lowes and installed them Jan 10. They are well-designed with rubber gaskets to keep out water and fit tightly against the wall. I used some silicon caulk around the fixture to join it to the rough stucco wall coating to keep out hurricane-force rains.

The blue light on the ground is one of the color-changing solar lights that surround the pool area. I found them on the Internet at HomeDepot.com.
